Developing a Flight Delay Prediction Model using Machine Learning

Team ID- PNT2022TMID27775

Project Objectives:

• You'll be able to understand the problem to classify if it is a regression or a classification kind of problem.

• You will be able to know how to pre-process/clean the data using different data pre-processing techniques.

• You will able to analyse or get insights into data through visualization.

• Applying different algorithms according to the dataset and based on visualization.

• You will be able to know how to build a web application using the Flask framework.
